

## OKTAL SYNTHETIC ENVIRONMENT won a contract with DASSAULT AVIATION

OKTAL-SE has a long experience with major aircraft manufacturers like AIRBUS or EUROCOPTER. Our tools are used during development phases in immersive training contexts. They provide state of the art real time visible and infra-red rendering of synthetic environment.

OKTAL-SE is proud to announce that **the SE-Workbench-EO Advanced suite has also been selected by DASSAULT AVIATION.** The aircraft manufacturer will perform IR sensors studies in various key 3D environments designed by OKTAL-SE: Airport, rural and urban zone, mountain zone, maritime zone and desert areas. The 3D databases are already classified in the Infra Red domain using SE-CLASSIFICATION and SE-PHYSICAL-MODELER and are delivered ready to use.

In addition, OKTAL-SE has developed a library of objects enabling DASSAULT AVIATION to be autonomous in the use of the **SE-Workbench-EO** for various civilian or military applications and scenarios. The objects, also fully classified, are ready to use to populate the 3D synthetic environments provided.

*DASSAULT AVIATION is one of the major players in the global aviation industry. It is a reasonably sized and financially secure private international group, with a presence in more than 70 countries across 5 continents. In 2010, Dassault Aviation produced 95 Falcons (record), and 11 Rafales confirming a non stopping profitability since 1936.*
